

Do you love the Maryland Science Center? Become a Volunteer!

The mission of the Maryland Science Center is to create awareness in everyone of the importance of science in our lives by engaging them with exciting educational experiences. It is also to motivate our youth to pursue careers in science and technology through community collaboration with academic government and industry.

Today, and for more than 40 years, the Maryland Science Center has demonstrated a commitment to emphasize to its many audiences the importance of Science, Technology, Engineering and Mathematics (STEM). No other institution in the state reaches more teachers and students.

Volunteers are an integral part of the Maryland Science Center and are essential to the success of the institution. Join us as we inspire and prepare the next generation of great scientific minds!

Maryland Science Center volunteers support the institution and its staff in many ways and volunteering opportunities are available in almost every department.

You do not need to be a scientist to apply; we welcome volunteers of all backgrounds!

Why volunteer?

- MSC is an environment that fosters curiosity, sparks creativity and encourages continual intellectual growth
- Support our mission to bring the best of informal, hands-on science education to our visitors
- Engage with guests from all over the world
- Gain new skills and experience
- Have FUN!

How to volunteer?
